

QUADRANT

The Participant Management Tool for Researchers

Quadrant is a participant management and data collection software tool. Quadrant makes it easy for you to

Streamline your research process - Track participants and project progress while storing your data in one central location.

Share with your team globally - Instantly collaborate across institutions, both domestically and internationally.

Ethics and funding requirements - Remove data and task duplication; manage your team members access within an auditable space.

Know your data is safe - Stored and backed-up on Australian servers, all your data is safe and immediately available.

Dedicate your time where it's needed. Use Quadrant to remove the hassle of emails, spreadsheets, and file sharing tools to manage your research project.

Who should use Quadrant?

Quadrant is designed for qualitative or mixed-method researchers who need a virtual research environment to track participants and help manage research data. Sign up today and reap the many benefits that Quadrant has to offer.

Frequently Asked Questions

Do I need to install software on my computer to use Quadrant?

No, Quadrant is a cloud-based application which is accessed through a secure website via your favourite web-browser.

I collect sensitive data from my participants. Is my data safe?

Yes, Quadrant allows you to delegate roles to ensure only who you choose have access to your data. Quadrant takes automatic back-ups, which are stored in two separate locations within Australia.

I'm a research team of one; will Quadrant still be of use to me?

Yes, you can use Quadrant to track your research progress and securely share your data with colleagues.

Can I use Quadrant to share my data with collaborators outside my institution or internationally?

Yes, anyone with a valid email address can use Quadrant.

What if I leave university or change institutions, can I still use Quadrant?

Yes, you can continue to use Quadrant as it is a cross-institutional tool.

How much does Quadrant cost?

Quadrant is free to use .

Is Quadrant approved for use by my Human Research Ethics Committee?

Quadrant is designed to be consistent with the principles articulated in the National Statement in Human Research on Ethical Conduct. Reference material for the NEAF can be found at www.quadrant.edu.au

QUADRANT

The Participant Management
Tool for Researchers

A secure, centralised cloud-based tool to collect, share and manage your research data.

'I believe Quadrant is the way of the future and I am pleased to move on from the endless files of information, tedious processes of team communication and wasted hours of tracking needed information.'

- Associate Professor Pam McGrath,
Griffith University

'Since we are a multi-institutional centre, the biggest benefit from using Quadrant is to have one central place where we feel confident saving all our data and that we are able to share data among our team and our nominated partners.'

- Dr Tina Janamian,
APHCRI Centre of Research Excellence

'I often think of managing research projects as a juggling act and the challenge is always to avoid 'dropping a ball.' With Quadrant I never drop a ball, it keeps me totally organised.'

- Nicole Rawson,
Griffith University Research Officer
